Project description:

Here is our project of book store management system. Here at the front end, we show our books categorized by categories. And if customer login to his account he can add books to the cart. If he doesn't have any account, he can create one.

After adding books to the cart customer can see his cart and proceed to payment. By clicking the checkout, the customer sees the address for confirmation and place the odder. Then admin/user sees the order and changes the status to pending or confirm. Customer will pay cash on delivery.

In the admi part admin can add product and category. And also, he can see how many books, categories and pending orders are there in the dashboard. Furthermore, he can see the salse report according to the month.
